

BACK TO THE BASICS: MyRemedi Web Portal

with Erin Donatelli, PharmD, BCGP
Vice President of Clinical and Consulting Services

In this issue, we're bringing it back to the basics to highlight our web portal, MyRemedi. Remedi's customer-inspired web portal provides real-time pharmacy data that helps you and your teams make the best financial, operational, and clinical decisions, 24/7/365.

Accessing real-time information and tools allows you to focus on cost containment, track high-risk quality areas, monitor medication order deliveries, and make informed decisions. MyRemedi can answer many of your frequently asked questions and solve problems with its robust and easy-to-understand data. Please contact your Remedi Consultant Pharmacist or Account Manager for access or training.

Residents with Multiple PRN Psychotropic Orders

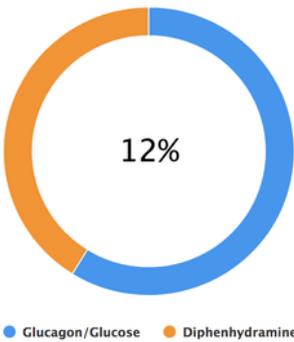

F757: UNNECESSARY DRUGS
(without proper monitoring, in the presence of adverse consequences)

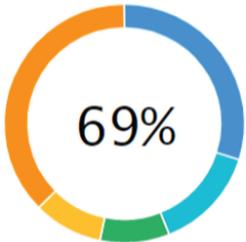

Residents on Narrow Therapeutic Medications

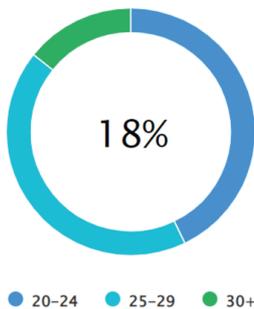

ADR Surveillance

% of PRN Orders Not Refilled in Over 60 Days

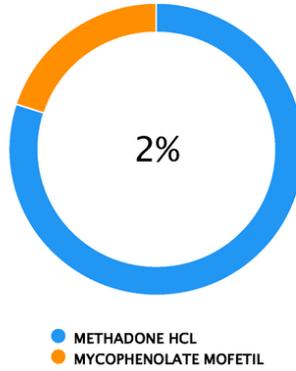

% of Residents with 20 or More Medications

F755: PHARMACY SERVICES
(medication availability to meet the needs of residents)

Residents with REMS Orders

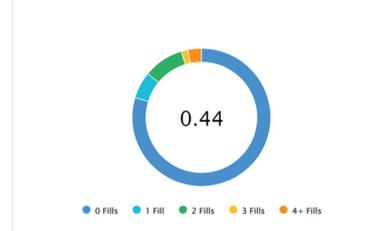

Residents on FDA Risk Evaluation and Medication Strategies (REMS). Drugs have specific requirements that must be met before they can be dispensed from the pharmacy.

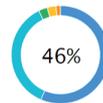

Reports / Controlled Medication Summary

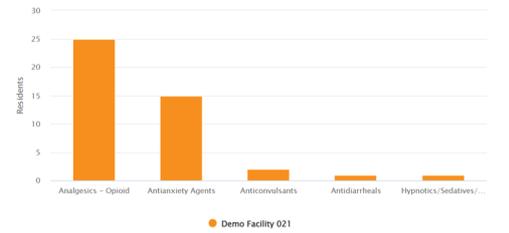

Controlled PRN Medications Filled in the Last 30 Days by Resident

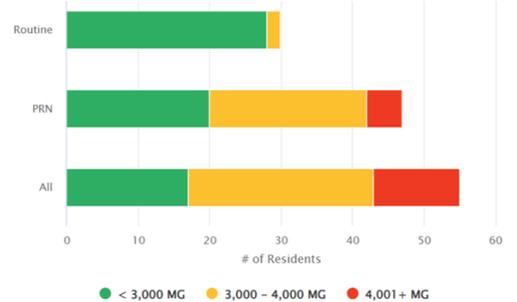

% of Residents on Controlled Medications

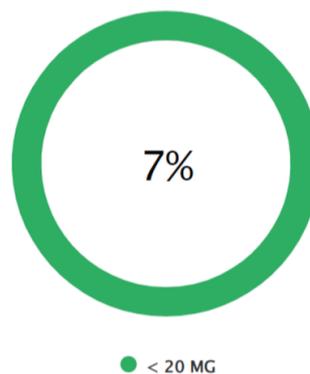

Residents on Controlled Medications by Drug Group

High Risk Total Daily Dose of Acetaminophen

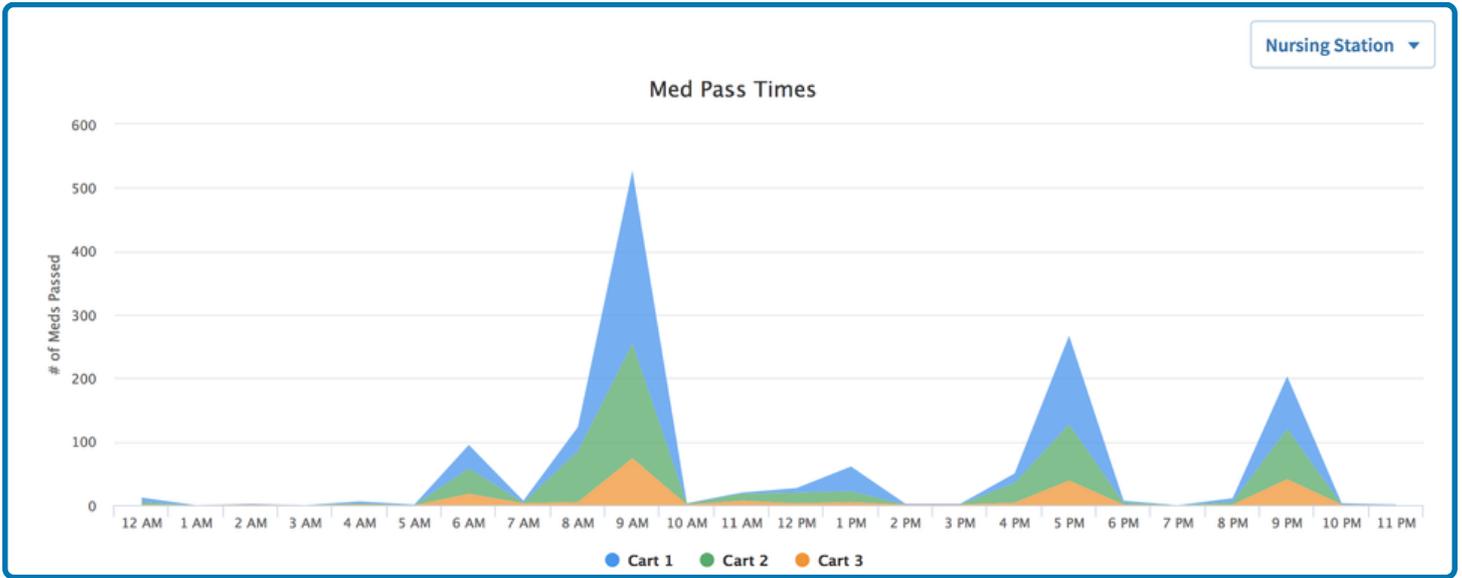

Residents with Opioids and Benzodiazepines

F561: SELF-DETERMINATION
(residents' right to choose their schedule)

Person-centered care and resident rights may be negatively impacted by disrupting a resident's sleep to administer medication when alternatives exist.

OPERATIONAL ADVANTAGES

- **Medication Search** – look for orders by drug class or individual drug name to easily assess resident lists for medication recalls, shortages, or clinical improvements.

- **Order Tracking and Delivery** - see detailed order status information from the moment of order entry, and follow the order to the time it is physically delivered.

Congratulations Remedi Superstar Nurse!

ANDREW GRAHAM, LPN
Lenawee Medical Care Facility, Adrian, MI

CONGRATULATIONS to Andrew Graham, LPN, Nurse Leader and Risk Manager, at Lenawee Medical Care Facility in Adrian, Michigan for being selected as the Remedi Superstar Nurse for this newsletter.

Andrew's DON, Kimberly Shaughnessy RN, BSN, submitted his nomination.

Read more about Andrew's positive impact below!

"Lenawee Medical Care Facility became lucky enough to gain Andrew, who began his career 12 years ago as a staff nurse. Throughout his career as a floor nurse, Andrew quickly gained the trust of his residents, their families, and the staff. He believed in a hands-on approach and learned his residents' preferences to give the highest quality of care. Andrew was always eager to learn new skills and assist others with any task. He continued to grow as a nurse and displayed leadership skills that did not go unnoticed by his co-workers and administration.

In 2018, Andrew was promoted to the position of Mobility Nurse Leader, where he ran the mobility program and managed two households within the facility. As a leader at the facility, Andrew continued his hands-on approach by supporting his household staff but also listening and providing coachable moments.

In 2021, Andrew took on an additional role as the Risk Manager at the facility. Andrew collaborates with the residents, their families, the staff, and the interdisciplinary team to investigate and identify the root causes of the bruises, falls, and skin tears that our residents experience. He continues that same level of collaboration and implements new interventions to decrease the risk of recurrence. Andrew continues to grow in his knowledge of the survey process, regulations, and facility policies. He has a big-picture mentality and understands why the facility provides evidence-based care to the residents and their families.

Andrew has a positive attitude towards all aspects of his job and the challenges that arise. The staff respect him and see him as a role model. Andrew takes each opportunity to mentor the unit nurses and the CNAs to ensure that the team understands why we provide the highest quality of care to our residents. The residents and their families always compliment Andrew on his kindness and attention to detail. Not only is Andrew a Superstar at Lenawee Medical Care Facility, but he also wears the hat of a Superstar outside of work. Andrew has learned to balance his work life with his home life. He is active with his children's school and extracurricular activities. Andrew and his family also enjoy spending time camping and staying physically active. He can also be found supporting his church in many ways. Andrew plans to pursue his registered nurse degree in the near future while continuing to grow his long-term care experiences at Lenawee Medical Care Facility. Andrew Graham is genuinely an all-around Superstar!"

NEW

Monthly EDUCATION!

MyRemedi® New User Training

Designed for new users, these 30-minute sessions will provide a basic overview of the clinical and financial highlights of MyRemedi. A quick, yet thorough introduction to its features and benefits.

The clinical overview is held on the first and third Wednesday of each month.

The financial overview is held on the third Wednesday of each month.

Hosted by:

Linda Popella
Account Services Training Coordinator

Contact your Account Manager or Consultant Pharmacist for more information and to be added to the invite list!

Rx CARE INSIGHTS

Monthly webinars designed for clinical and administrative staff.

Hosted by:

Erin Donatelli, PharmD, BCGP
VP of Clinical and Consulting Services

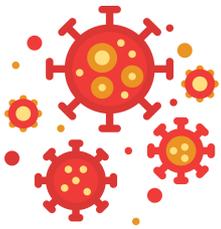

Sarah Griffie, PharmD, BCGP
Lead Consultant Pharmacist
Midwest Region

These short, yet informative sessions will provide insights and perspectives on the latest clinical and regulatory information, with a focus on the impact of F-tag citations. Our team will also share tools and resources to help you navigate the complexities of long-term care and elevate your pharmacy experience.

Held on the second Wednesday of each month.

Respiratory virus season is just around the corner. Vaccines are still the most effective way for seniors to prevent serious illness, hospitalizations, and fatalities. The best guidance is for your residents to receive every vaccine recommended for their age group. Below is a brief overview of this fall's recommendations.

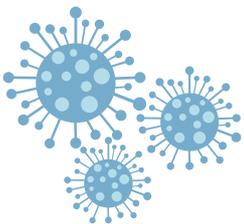

Detailed information on the influenza vaccine was recently distributed to our customers. Please contact your Consultant Pharmacist and Account Manager if you have any questions or need more information.

Influenza Vaccine

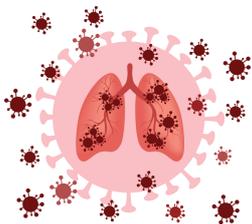

Is recommended annually for all individuals over the age of 6 months who do not have contraindications.

Should be administered by September/October and continue to be offered if influenza viruses are circulating.

COVID-19 Monovalent Vaccine

Individuals 5 years of age and older regardless of previous vaccination are eligible to receive a single dose of an updated mRNA COVID-19 vaccine at least 2 months since the last dose of any COVID-19 vaccine.

RSV (Respiratory Syncytial Virus) Vaccine

Newly approved vaccine for adults 60 years and older. CDC recommends this vaccine through shared clinical decision making between prescriber and recipient. Vaccine ordering materials will be available in September.

Influenza and COVID-19 vaccinations can be co-administered, however, the risk versus benefit of adding a third vaccine at the same time should be evaluated.
